JET SET WILLY 2

THIS GAME IS NOT YET ANOTHER PROGRAM COPYING THE ORIGINAL BUT IS IN FACT THE ORIGINAL AGAIN BUT WITH DIFFERENT MONSTERS AND MORE SCREENS. THE NEW GAME INCLUDES A SPACE SHIP SCREEN AND MANY OTHER NEW AND DIFFERENT SCREENS. ALTHOUGH THIS GAME IS MUCH LIKE THE ORIGINAL IT IS QUITE WORTH THE PRICE AND NO DOUBT THERE WILL SOON BE MANY POKEs FOR THIS GAME.

PRICE: £6.95

RATING : 7

FRANK BRUNO'S BOXING

THIS IS ANOTHER OF ELITES GAMES AND IT'S UP TO THE USUAL HIGH STANDARD. PROGRAM : Charlie and the Chocolate Factory
PRICE : £9.95
MICRO : Spectrum
SUPPLIER : Hill MacGibbon
 8 Grafton Street
 LONDON W1X 3LA

If you think of Charlie and the Chocolate Factory, not as anything dramatically wonderful or original, but as five reasonable arcade games for £9.95 then its rather good.

This is loosely related to the famous book by Roald Dahl and included in the £9.95 is a copy of the book.

There are four single screen games of various kinds, Augustas Gloop is a sort of sliding-block puzzle, Veruca Salt is a dodge game as is Violet Beauregarde and Mike Teavee is a platform / collect game.

There is a multi-screen Miner-style affair on the other side of the tape where you try to get through the machines of the chocolate factory and collect six golden keys.

Not as good as Manic Miner, but it's OK and is a reasonable way of getting a number of competent arcade games very cheaply

MORE POKEs

Knightlore-type CLEAR 40000:LOAD "" as for Underwurld. When OK appears POKE 24745,251:POKE 24754,251:POKE 24792,207:POKE 24793,193:RANDOMISE USR 24744. Ignore the error, NEW and you can now enter your routines at address 62425 onwards. However, since there are a lot of things to do on this game, it will probably be simplest if you just type POKE 62425,251:POKE 62422,201:RANDOMISE USR 62374. This will load in the main block of code and dump you back into basic.

Once this is done, POKE 53567,0 will give infinite lives POKE 50087,201 will stop metamorphosis POKE 50206,0 will give indefinite days or POKE 49759,n where n is the number of objects to be collected. If you also POKE 54562,195:POKE 54563,108: POKE 54564,175 it will allow you to restart the game by pressing the pause key which is usefull if you have infinite lives. RANDOMISE USR 24832 will start the game.

If you want to see something really special then enter this short routine FOR N=26796 TO 26813:INPUT A:POKE N,A:NEXT N (ENTER). Then enter these numbers in turn 7 154 162 155 163 156 165 157 165 64 220 29 2 74 146 5 77 149

PROGRAM : Leonardo
PRICE : £7.95
MICRO : Spectrum 48K
SUPPLIER : Creative Sparks
 Thorn EMI
 Computer Software

Calling a graphics program Leonardo could be seen as foolhardy self confidence, making a comparison with the great artist himself.

Leonardo is one of the better offerings in this highly competitive market.

Freehand drawing by cursor keys or even better by joystick, is catered for with line, rubber-banding, variablebrush width etc.

The cursor can draw continuous or broken lines and there are also very good circle, arc, and ellipse commands.

The windowing commands allow for picture element manipulation, such as magnification and mirror imaging.

Details can be held in memory and repeated as a brush pattern. Windows or the full screen can be scrolled as well, which is useful for avoiding attribute problems. The UDG system is not very good but putting them in the picture is relatively easy.

My main criticism is it is far from being user friendly.

COMPETITION CORNER

On this page from now on we shall have a competition. There will be a puzzle which you have to work out and the first person to hand in a correct set of answers will receive printouts and a poster.

QUIZ 1: Two people Jake and Hank are two old two-timers who live next to each other on Peartree Boulevard.

Jake is very keen at figuring and he found that the product of their two addresses could be said to equal 'PEARTREE'. For example, if the street numbers were 7933 and 7934 (they differ by just one) then the product would be 62940422. If this is compared with the word PEARTREE it can be seen that like digits correspond to like letters.

PEARTREE
62940422

However, in the case of Jack and Hank, all the digits in their addresses are also to be found in the product, which is not the case in the example given (there is no 7 or 3 in the product). What are their addresses?

*****NEWS FLASH FROM ASM*****

THE AGREEMENT WITH CLIVE SINCLAIR AND ROBERT MAXWELL HAS NOW BROKEN DOWN. MAXWELL HAS BACKED AWAY FROM THE AGREEMENT AND SAYS THAT HIS TAKE OVER BID "JUST DID NOT GEL". SIR CLIVE HOWEVER DOES NOT SEEM TOO WORRIED AS DUE TO HIS QL EXPORTS TO AMERICA HIS SALES ARE NOW UP TO 80% OF LAST YEARS FIGURES. TO HELP CLIVE OUT DIXON'S ARE NOW THINKING OF SELLING A NEW SPECTRUM PLUS PACKAGE CONSISTING OF THE PLUS, A JOYSTICK, A JOYSTICK INTERFACE, A DATA RECORDER AND TEN SOFTWARE TITLES ALL FOR £139.99.

POKES GALORE

This little program allows you to produce a new header for any spectrum program and prevent it from auto-running.

Simply follow the prompts to produce your new header, then run the program, insert the original game and save the new header onto a blank tape. Then reset the computer by using RAND USR 0.

Now follow these steps to get the desired effects for UNDERWORLD.

Type CLEAR 40000:LOAD "", Play the new header, followed by the original tape which has been wound past its own header. When the OK message appears stop the tape. Type POKE 24791, 251:POKE 24792, 207:RANDOMISE USR 24740.

Ignore the error message that appears

and type NEW. Then from 62421 onwards poke the following numbers for infinite lives 62,0,50,240,231,50,244,231,195,242,103; or to stay immortal after finding a gem 62,0,50,153,148,50,154,148,195,242,103; or to make weapons appear in the same place each game 62,0,50,199,232,195,242,103; or for no enemy in the game 62,201,50,219,175,195,242,103.

Finally type RANDOMISE USR 62374 to start the main machine code loading.

C5 UPDATE.

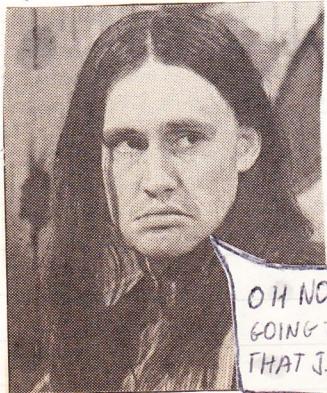

YOU MAY WELL REMEMBER THAT IN THE FEBRUARY ISSUE OF THIS YEAR WE DID AN ARTICLE ON THE C5'S AND THEIR CAPABILITIES WELL NOW (AT GREAT EXPENSE TO A.S.M) WE HAVE SENT OUT A REPORTER TO SAMPLE THIS PRODUCT FOR YOU. I CAN NOW (FROM EXPERIENCE) TAKE BACK MOST OF THE NASTY THINGS I SAID IN THE LAST REPORT AS THE C5'S AREN'T AS BAD AS EVERYONE SEEMS TO BE MAKING OUT. THE RADIUS HOWEVER IS NOT 20 MILES AS CLAIMED BY SIR CLIVE BUT SOMEWHERE NEARER 12 MILES IF YOU'RE LUCKY, AS THE BATTERY RUNS OUT QUITE QUICKLY AND MORE SO DEPENDING ON HOW LONG YOU KEEP YOUR FINGER ON THE TOUCH SENSITIVE MOTOR CONTROL SITUATED ON THE UNDERSIDE OF THE LEFT HANDLEBAR. HOWEVER YOU HAVE AMPLE WARNING OF WHEN THE BATTERY IS DUE TO RUN OUT AS YOU HAVE A SMALL ELECTRONIC GAUGE IN FRONT OF YOU WHICH CONSISTS OF SMALL COLOURED BLOCKS WHICH SLOWLY DISAPPEAR AS YOUR BATTERY POWER DIMINISHES. WHEN YOU ARE DOWN TO ONE COLOUR BLOCK A HIGH PITCHED ALARM SOUNDS TO WARN YOU TO START PEDALING! HOWEVER THE C5 ALSO HAS SOME FAULTS WHICH NEED MENTIONING. FOR A START THE MOTOR IS NOT POWERFUL ENOUGH TO START THE VEHICLE ALL BY ITSELF TO START YOU MUST PEDAL AS WELL TO HELP THE HOOVER ENGINE ALONG. I ALSO FOUND A SMALL ERROR IN THE DESIGN-IF YOU STOP WITH THE PEDALS IN A CERTAIN POSITION IS IS NEARLY IMPOSSIBLE TO START AGAIN AND IF YOU PEDAL BACKWARDS THE CHAIN USUALLY COMES OFF THIS MEANS THAT IT IS POSSIBLE TO BECOME STRANDED OUT IN THE MIDDLE OF NO-WHERE WITH A FLAT BATTERY AND A BROKEN CHAIN!

ONE GOOD THING ABOUT THE DESIGN HOWEVER IS THE FACT THAT WHEN YOU GO THROUGH PUDDLES THE WATER IS DIRECTED DOWN BACK ONTO THE GROUND INSTEAD OF UP IN FRONT FOR YOU TO DRIVE INTO OR OVER THE SIDES OF THE VEHICLE. THERE IS ALSO A HOLE IN THE SEAT WHICH ALLOWS THE WATER THAT COLLECTS IN THE C5 IN THE RAIN TO DRAIN AWAY BUT THE DESIGN DOES NOT ALLOW WATER TO BE SPLASHED UP THROUGH THE HOLE ONTO THE SEAT.

THE C5'S HAVE NOW INFACt DECREASED IN PRICE AND AFTER A GREAT DEAL OF EXPENSIVE RESEARCH WE HAVE DECIDED THAT £299 IS PROBABLY THE BEST C5 ASKING PRICE AROUND.

SPECTRUM AND ZX81 PAGE.

ONE OF THE disadvantages of any sort of input on the ZX81 is the computer's lack of an auto repeat facility on its keys.

This program gives you just that. It works by intercepting the display interrupt (called 50 times a second) using interrupt mode 2. The routine is held at 7F20 onwards.

If a key is held down for a short while (adjust this by poking 32566 with a value from one to 255) then the routine continuously sets the debounce system variable to 0, making the operating system think it has received a new keypress.

Enter the hex loader followed by the hex code in the disassembled listing. Delete lines 10-90 and then enter the second program. Run to save. To call the routine Randomise Usr 32537.
